

## HC8318

Semi Automatic Wire Inserter/Closer

### Description

The HC8318 is a stand alone Wire closing unit ideally suited to large format 3:1" wire closing. With a 457mm (18" inch) closing width and extendable feed tray, it makes an ideal partner for the **HD7500** wide format punching unit. The HC8318's unique design means that you no longer need to manually feed the wire (and calendar hanger) onto the document that requires binding, instead you place the wire and hanger into the HC8318 and then simply slide your document into the closing jaws. The closing handle is then pulled and the wire is automatically inserted into the document. Able to handle all 3:1" wire sizes between 6mm and 14mm (1/4" to 9/16") the HC8318 will make light work of standard or calendar wire binding.

### Features and Benefits

- Inserts and closes wire in one easy step.
- 457mm (18" inch) Width closing capability.
- Slide out table extension to support larger work.
- Closes 3:1" wire sizes between 6mm and 14mm (1/4" & 9/16")
- Binds standard or split wire with Calendar hangers.
- Light weight and portable.
- All metal construction.
